

One Step Away

The Mavericks

8 bar intro - (double-Long)

My baby loves the things I say
She wants to hear them every day
I hope we'll be together
From now until forever
Right now we're just one step away

My baby wonders why I'm blue
When she pretends that we are through
So I'll just have to show her
That once I get to know her
Then we won't be one step away

{ And if she knew that I was - hurting inside
Then soon behind my broken
heart I could no longer hide

I want to kiss her every night
But not til everything is right
She will not wait forever
She says it's now or never
Right now we're just one step away
