

Smoke rings in the Dark Key: D

I won't make you tell me - what I've come to understand
you're a certain kind a woman - I'm a different kind of man,

I tried to make you love me - you tried to find the spark
of the flame that burned but somehow
- turned to smoke rings in the dark.

The loneliness within me - takes a heavy toll
'cause it burns as slow as whiskey
- through an empty aching soul,

and the night is like a dagger - long and cold and sharp
as I sit here on the front steps - blowing smoke rings in the dark.

[I -- know I must be going... 'cause love's--- already gone,
and all I'm taking with me - are the pieces of my heart
and all I'll leave are - smoke rings in the dark.

The rain falls where it wants to - the wind blow where it will
everything on earth goes somewhere
- but I swear we're standing still,

so I'm not gonna wake you - I'll go easy on your heart
I'll just touch your face and drift away
- like smoke rings in the dark,
